

## Management Summary

The cbs Implementation Package for SAP GRC NF-e offers companies an accelerated and cost-efficient implementation of the Brazilian Nota Fiscal Eletrônica based on the SAP solution “SAP BusinessObjects Electronic Invoicing for Brazil” (SAP BusinessObjects Nota Fiscal Eletrônica or briefly “SAP GRC NFE”).

## Nota Fiscal Eletrônica

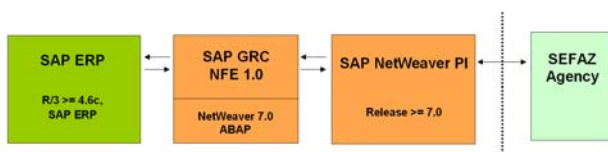

European companies with subsidiaries or plants in Brazil are obliged to report the Nota Fiscal to the Brazilian government agency SEFAZ.

To handle the large amount of documents and to accelerate and automate the overall process, the Nota Fiscal Eletrônica enables companies to send their documents electronically via the Internet. Since 2008 and beginning in April 2009 several industries like automotive suppliers or oil & gas industry are legally obliged to use the electronic transmission.

## SAP GRC NFE

For companies which have already implemented the Nota Fiscal in their SAP R/3 or ERP system, SAP offers the SAP GRC NFE solution to send the Nota Fiscal Eletrônica to the SEFAZ agency and to exchange these documents with their business partners.

The SAP GRC NFE solution is usually installed on a separate SAP application server and utilizes SAP NetWeaver PI to encrypt and send the data to the Brazilian SEFAZ agency.

## cbs Implementation Package

The cbs Implementation Package for SAP GRC NFE comprises an accelerated implementation of SAP GRC NFE and addresses companies which currently use the paper-based Nota Fiscal in their SAP R/3 or ERP applications.

The offering comprises the configuration of the SAP GRC NFE solution and its technical integration to SAP ERP and the Brazilian SEFAZ agency. Optional additional services are the technical installation of the SAP GRC NFE and SAP NetWeaver PI.

## About cbs

cbs Corporate Business Solutions provides global SAP business solutions for industrial companies.

As SAP's strategic development and support partner for SAP GRC NFE, cbs offers exclusive expertise and comprehensive implementation practice.
